

# GILDED in gold

Mixing the style and elegance of the 18th-century and Italian Renaissance, the hallmark of La Contessina is extravagant and sumptuous design. Initially, the brand started business by manufacturing bespoke ranges of silk and velvet embroidered fabrics, but, to satisfy popular demand, the company began producing furniture and interiors as well. Initially focusing on residences and hotels for some of Russia's high-profile figures, the tailor-made work is now available to residents in Britain, should they wish to live like royalty. ■ [lacontessina.com](http://lacontessina.com)
